

Bell Pepper Yield - 4 Year Average (2008-11)

The ACLF Base fertilizer program yielded 14% (1.9 tons/acre) more marketable peppers than the conventional fertilizer program, averaged over 4 years.

In these studies, 100% of the fertilizer was applied prior to planting and/or with the transplant water.

Conventional = 167#N, 40# P₂O₅ and 136 # K₂O / Acre. (28% UAN, 10-34-0 & 0-0-62)

ACLF Base = 33 Gal High-NRG-N, 4 Gal. Pro-Germinator, 10.5 Gal Sure-K and 3 qt Micro-500 per acre.
