

Navy Bean Yields Improved with LIQUID

Navy Bean yields can be pushed higher with **AgroLiquid** nutrition. A 3-year average of Navy Bean yields at the **North Central Research Station** showed a big advantage for using foliar applications of **ferti-Rain** or **NResponse + eNhance**. Simply add an **AgroLiquid** foliar treatment and realize the yield advantage yourself!

Navy Bean Foliar Comparisons - 3 Year Average

North Central Research Station - 2010-2012

*AgroLiquid: Rates varied between years based on soil test data - all were applied (2x2)
ferti-Rain: 3.25 gal/A (2010), 2qt/A (2011-2012)
NResponse + eNhance: 1 gal/A + 2 qt/A - all years
