

Micro 600™

The Flavonol Polymer Technology in Micro600™ allows for effective uptake and utilization of the micronutrients by the plant. Applications at planting, as foliar, or through irrigation all produce excellent results. This product can be used as a recovery aid or as a preventative measure to overcome the symptoms of iron chlorosis – even in soils where soils tests indicate sufficient levels of iron.

Technical Data

DIRECTIONS FOR USE

Micro600™ may be used as a micronutrient component in any fertilizer application method. Each crop has minimum requirements for micronutrients in specific proportions to each other. The synergy of applying the combination of the nutrients found in Micro600™ benefits most cropping programs and soil types - especially in high pH soil conditions.

Micro600™ can be applied:

- with versatile planter placement options
- as a sidedress
- as a foliar application
- through fertigation
