

PrimAgro K™ is an advanced, high-efficiency potassium solution containing sulfur with a near perfect pH for the effective delivery of organically derived biological components and BioActivites™. The PrimAgro™ Technology in K deploys targeted microbe populations that decompose organic matter in the root zone releasing potassium while strengthening the potassium absorption mechanisms within the plant. PrimAgro K™ is also chloride- and hydroxide- free.

Technical Data

DIRECTIONS FOR USE

PrimAgro K™ can be used in virtually any cropping situation where potassium is recommended. PrimAgro K™ should be used under normal planting conditions, where soil temperatures permit proper germination.

PrimAgro K™ can be applied:

- with versatile planter placement options
- broadcast or banded over the top of the seed zone
- as a topdress
- as a sidedress
- through fertigation

In general, where liquid fertilizers such as PrimAgro K™ are applied in horticultural crop production, it is customary to split the seasonal fertilizer needs into a number of smaller applications. In this case PrimAgro K™ may be used for early-season potassium, while AgroLiquid Sure-K® may be more appropriate for mid- and late-season application. PrimAgro K™ is not recommended as a foliar.

Composition Guaranteed Analysis

Total Nitrogen (N)

1.00%

0.50% Nitrate Nitrogen
0.50% Ammoniacal Nitrogen

Soluble Potash (K₂O)

8.00%

Sulfur (S)

6.00%

6.00% Combined Sulfur

Derived from: Ammonium Nitrate,
Potassium Carbonate, Potassium Sulfate

ALSO CONTAINS NON PLANT FOOD INGREDIENTS

Contains 401 million total colony forming units per gallon
(4.01x10⁸ total CFU/gallon) of the following bacteria:

Bacillus subtilis 5.30x10⁴ CFU/mL
Bacillus methylotrophicus 5.30x10⁴ CFU/mL

Microorganisms exempt from CFR requirements – 40 CFR 725.
Store in a cool, dark place to maximize shelf life.
Expires 12 months from delivery date.

Consult your AgroLiquid representative for specific mixing, use recommendations, and rates.
